- National Archives and regional branches (see page 4)
- Many social security and post offices have blank forms

Transcripts ordinarily show age (not birth date) at the time of the census, gender, relationship to the householder, and—where requested—race. If obtained in the particular census, state or country of birth (but not place), citizenship, or occupation can be listed as well. A “full schedule” showing all of the information

collected for one individual in a given census (see above for questions) can be ordered at extra cost.

The records are organized geographically, rather than by name, so except for those censuses that have indexes (see page 1), addresses are necessary to find them. Thus, the Census Bureau's files cannot be used to locate missing persons, obtain addresses (prohibited by law in any case), or even discover how many people have the same surname. The Census Bureau publication,

*Age Search Information* (Washington, DC, 2000), has details about this service and also discusses other possible sources of data about individuals. You can download this publication at <[www.census.gov/prod/www/abs/gen-ref.html](http://www.census.gov/prod/www/abs/gen-ref.html)>.
