

During this phase of distance learning and online coursework, you may find yourself missing the ability to visit Morris Library and browse the shelves in person. We know how you feel!

The ability to browse books on your research topic can lead to exciting and unexpected discoveries. The good news, is that you can browse the shelf online as well!

After you perform your initial search in DELCAT Discovery and decide on a print book that you want to view, simply click on "Browse the Shelf" to find neighboring items on the shelf. Viewing similar resources online is slightly different than scanning the stacks in person. A virtual review of neighboring books may be just the technique you need to find additional resources for your research. Results that appear in "Browse the Shelf" on this page, reveal where each book is located or if they have an ebook version available.

If you have any questions along the way, please reach out to a librarian who is ready to assist you with your research.

Happy browsing!
